## Symbols glossary

- A** A: Product drying performance, measured from A+++ to D / G depending on the product family
-  Air cooling system: to ensure a safe surface temperatures.
-  Electric
-  Fresh Touch: Most of Smeg ovens have a "cool door." Thanks to the combination of tangential cooling and internal heat-reflecting glasses, the temperature on the outer surface of the door is maintained below 50° C. In addition to providing safety, this system protects the sides of the furniture from overheating by the oven.
-  Circulaire: The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.
-  ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.
-  Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.
-  All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.
-  Side lights: Two opposing side lights increase visibility inside the oven.
-  The oven cavity has 4 different cooking levels.
-  The capacity indicates the amount of usable space in the oven cavity in litres.
- B** B: Product energy rating, measured from A+++ to D / G depending on the product family.
-  Triple glazed doors: Number of glazed doors.
-  Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.
-  Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.
-  ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.
-  Grill element: Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.
-  Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.
-  The inner door glass: can be removed with a few quick movements for cleaning.
-  The oven cavity has 3 different cooking levels.
-  Tilting grill: the tilting grill can be easily unhooked to move the heating element and clean the roof of the appliance in one simple step.
-  The capacity indicates the amount of usable space in the oven cavity in litres.

The capacity indicates the amount of usable space in the oven cavity in litres.
